Change Request Tracking Updates

During the June 2021 Local Release CLEC test window, an issue was identified that could potentially cause unnecessary rejects of submitted Local Service Requests (LSRs). After further research, Frontier has determined that a Type 1, Severity 2 change request to adjust the edit elements associate with FTRLSR331 is required to prevent negative impacts to our CLEC customers. For more information, please CCBFTR01927 see link above.

No new Type 5 Change Requests are open at this time. Please visit the OSS Interface Change Management page of our website for more information at:

<https://wholesale.frontier.com/systems-and-online-tools/local-oss-interface-change-management>.

If you have questions regarding the information provided in this notice, please contact FTR-CMP-Team@ftr.com.
