

Carrier Customer Bulletin

Date of Bulletin: August 3, 2017
Notice #: CCBFTR01414
Audience: CLEC, Reseller Receiving BDT Files
Subject: Local Billing BDT File Change for 4015XX Records
Date Effective: October 11, 2017

Frontier Communications is providing notification of a BDT file change impacting the 4015XX records of local billing data files.

The FID information, supplied in the 4015XX records of the local billing BDT file, will be modified to supply the Telephone Number (TN), Billing Telephone Number (CKR) and Circuit ID (CLS), if one exists. The chart below provides the current format and the new format of the 4015XX records effective October 11, 2017.

CURRENT FORMAT	NEW FORMAT
When a circuit ID existed: CLS nn.AAAA.nnnnnn..AAAA/CKR nnnnnnnnn	When a circuit ID exists: TN nnnnnnnnnn/CKR nnnnnnnnnn/CLS nn.AAAA.nnnnnn..AAAA
When no circuit ID existed: TN nnnnnnnnnn/CKR nnnnnnnnnn	When no circuit ID exists: TN nnnnnnnnnn/CKR nnnnnnnnnn

Frontier testing, both internally and with participating CLECs, identified that the change should only require CLECs to make an importing program update if the importing program being used cannot parse out both the Telephone Number and Circuit ID for a single record.
