The native NPA NXX belonging to the Little Meadows DMS10 remote switch and associated remotes will be rehomed upon decommissioning of the switch and reflected in the Local Exchange Routing Guide (LERG) for the Norwich, NY PEO switch. This will occur on or after October 6, 2024.

Network Changes and Trunk Rearrangements:

The Norwich, NY PEO switch will be the recipient office of traffic migrated from the Little Meadows DMS10 remote switch. Traffic bound for the codes listed in Table B will be delivered via the Norwich, NY Tandem (NRWCNYXA03T Intra-Lata SHA/ NRWCNYXA03T Inter-Lata FG Access SHA).

After all traffic is migrated off the Little Meadows PA remote switch, it will be retired and removed from the network.

Description of Reasonably Foreseeable Impact of the Planned Changes (cont.):

CLECs, IXCs, IECs, wireless carriers and paging carriers will need to secure new trunk groups built to the Norwich Tandem or have existing trunk groups, to that switch, augmented. Carriers that have direct end office trunks (DEOT) with access connectivity in the Little Meadows DMS10 remote switch will be required to reposition the codes to the Norwich Tandem switch.

All ASRs (Access Service Requests) for the Norwich Tandem switch must be received no later than September 6, 2024, to provide sufficient time to migrate the traffic described above. All traffic must be moved by October 6, 2024. All ASRs for the Norwich Tandem switch must carry the project code of LTMDPAXLRS0.

Please adhere to industry standards using normal procedures that pertain to updates and changes to the LERG for all NXXs subject to the retirement of the Little Meadows DMS10 remote switch.
