PRIVATE LINE TELEPHONE SERVICE

While the telephone company installs cable for its own use, based on the study of telephone development in specific locations, it occasionally becomes expedient to lease such cable pairs when idle for various purposes. At no time will this service take precedent over the requirement for these facilities to provide a customer with telephone service.

It is clearly understood by parties leasing cable pairs, including common carriers, that the telephone company may with minimum notice terminate said lease for such periods as may be required to provide telephone service when it would require these leased facilities to provide same.

For the purpose of this Tariff, a leased cable pair is one which begins at the telephone company central office main frame and terminates at some location. Telephone company central office main frame shall be considered as a single pair. No facility rearrangements will be made to accommodate leased cable pairs.

Monthly rate:

Each pair within base rate area of each exchange . . . . .	\$25.75	(I)
Each pair 1/4 mile or fraction thereof beyond base rate are additional . . . . .	1.25	
Loading, balancing, and/or equalizing . . . . .	2.50
