AT&T Mobility E-Path 1G to 10G UNI Cellsite Migrations ACT N & D

Overview

1. The purpose of this document is to provide ordering guidance when performing a 1G to 10G Migration for UNI's at a cellsite.

The following table is part of the CSBH schedule agreement and is subject to change.

18. Conversion of 1 Gbps to 10 Gbps and New 10 Gbps E-Path CSBH Service. Notwithstanding anything that may be to the contrary in the Agreement, 10 Gbps Service and conversions of UNIs from a 1 Gbps UNI E-Path CSBH Service(s) to an E-Path CSBH Service 10 Gbps UNI are subject to this Section 18. Provisioning of 10 Gbps at the Cell Site has not been implemented in all areas as of the date on which the Parties execute this E-Path CSBH Service Schedule. Customer has the option to request and Frontier will provide a quotation for, pursuant to Section 5, 10 Gbps Service or, if required to meet Customer's network capacity and utilization requirements, conversion of a 1 Gbps UNI E-Path CSBH Service(s) to an E-Path CSBH Service 10 Gbps UNI, at the rates contained in Exhibit A.

18.1 When ordering 10 Gbps Service and when converting UNIs from a 1 Gbps UNI E-Path CSBH Service(s) to an E-Path CSBH Service 10 Gbps UNI, Customer must first order two (2) 10 Gbps NNIs or two (2) 100 Gbps NNIs at the Service Hand-Off Location (regardless of whether, for example, an existing 10 Gbps NNI is in place).

18.2 A new 60-month Service Term will apply to the 10 Gbps UNI upon the Commencement Date.

18.3 Once a conversion pursuant to Section 18 has been completed, Customer will submit a disconnect on the 1 Gbps UNI E-Path CSBH Service and associated EVCs and applicable 1 Gbps UNI MRCs will continue to apply until such disconnect. ETL Charges shall not apply to the disconnected 1 Gbps UNI E-Path CSBH Service(s) provided that Customer populates the RPON field on the first disconnect ASR with the new install 10 Gbps UNI PON and the project field is populated with 1GTO10GCONV.

18.4 When there is more than one 1 Gbps UNI at a Customer Location and Customer submits a disconnect ASR pursuant to Section 18.1 and subsequently submits another disconnect ASR for a remaining 1 Gbps UNI at the same Customer Location, ETL Charges shall apply to the subsequently disconnected 1 Gbps UNI. Customer must leave the RPON field left blank (i.e., not populate the field) for the subsequent disconnect ASR(s).

UNI Stand Alone ASR Fields

Service Type:

ASR FORM - ADMINISTRATIVE		
Field	Entry	ASR Activity Type
ICSC	Frontier ICSC Code	N - Required D - Required
PON	Customer created PON	N - Required D - Required
DDD	ACT = N = 10 Business Day Interval ACT = D = 5 Business Day Interval	N - Required D - Required
PROJECT	1GTO10GCONV	N - Required D - Optional
REQTYP	ED	N - Required D - Required
ACT	N or D	N - Required D - Required
QSA	01	N - Required D - Prohibited
EXP	Populate if Expedite is requested	N - Required D - Prohibited
RTR	F - Send FOC only S - Send FOC and DLR (Prohibited on ACT D) N - No response required	N - Required D - Required
EDA	Early Date Acceptance Y - Early Appectance Authorized Prohibited when EXP field is populated	N - Optional D - Prohibited
SEI	Y	N - Required D - Required
CKR	FA Code (Cellsite) Field must contain 1GTO10G	N - Required D - Optional
PIU	100	N - Required
ECCKT	Required on disconnect activity	N - Prohibited D - Required
BAN	E, N or Fully Populated Current BAN	N - Required
RPON	Populate RPON field on the first 1G disconnect ASR with the new install 10 Gbps UNI ASR. Prohibited on all other 1G disconnects at the same location	N - Prohibited D - Conditional
QTY	1	N - Required D - Required
TSP	Example: TSP12345C-E Populate with circuit ID requested on original circuit	N - Required D - Required
