

Carrier Customer Bulletin

Date of Bulletin: February 3, 2022
Notice #: CCBFTR01994
Audience: Carrier, IXC, Wireless, CLEC, Reseller, ISP
Subject: Revised EIA and E-Path Tier Rate Structure NC/NCI/SECNCI
Job Aid
Date Effective: Immediately

In December 2021, Frontier introduced the new Switched Ethernet (Layer 2 TIER PNUM) NC/NCI/SECNCI & SPEC Codes job aid available from the [Ethernet NC/NCI/SECNCI Job Aids \(frontier.com\)](#) page. This notice is to advise of the following changes to the job aid:

- Tier NC/NCI/SECNCI & SPEC Code Job Aid has been updated to reflect Rate Adjustable Network Channel (NC) Code that now mirror the Bandwidth (BDW) Speed of the EVC.

Customers ordering services under contracts with the PNUM beginning with EIAV or EPAV must utilize the ordering codes, provided in the above job aid, on their respective Access Service Request (ASR) submissions to Frontier.

As a reminder, customers who do not have contracts with the PNUM beginning with EIAV or EPAV, or whose existing contract does not cover all Frontier regions, are encouraged to contact their Frontier Account Manager soon to negotiate a PNUM EIAV or EPAV contract.

If you have questions regarding the information provided in this notice, please email Carrier.Notifications@ftr.com.
