Description of Reasonably Foreseeable Impact of the Planned Changes (cont.):

CLECs, IXCs, IECs, wireless carriers and paging carriers will need to secure new trunk groups built to the Bryan Tandem or have existing trunk groups to that switch augmented. Carriers that have direct end office trunks (DEOT) with access connectivity in the Dime Box, TX DCO switch and remotes will be required to reposition the codes to the Bryan Tandem switch.

All ASRs (Access Service Requests) for the Bryan Tandem switch must be received no later than March 15, 2024, to provide sufficient time to migrate the traffic described above. All traffic must be moved by April 15, 2024. All ASRs for the Bryan Tandem switch must carry the project code of DMBXTXXADSO.

Please adhere to industry standards using normal procedures that pertain to updates and changes to the LERG for all NXXs subject to the retirement of the Dime Box, TX DCO switch and remotes.
