Network Changes and Trunk Rearrangements:

The Delta, UT PEO switch will be the recipient office of traffic migrated from the Delta, UT DMS10 and its remote switches. Traffic bound for the codes listed in Table B will be delivered via the Provo, UT Tandem (PROVUTMA1GT Intra-Lata SHA/ PROVUTMA1GT Inter-Lata FG Access SHA).

After all traffic is migrated off the Delta, UT DMS10 HSO and its remotes, it will be retired and removed from the network.

Description of Reasonably Foreseeable Impact of the Planned Changes (cont.):

CLECs, IXCs, IECs, wireless carriers and paging carriers will need to secure new trunk groups built to the Provo, UT Tandem or have existing trunk groups to that switch augmented. Carriers that have direct end office trunks (DEOT) with access connectivity in the Delta, UT DMS10 and its remote switches will be required to reposition the codes to the Provo, UT Tandem switch.

All ASRs (Access Service Requests) for the Provo, UT Tandem switch must be received no later than October 31, 2025, to provide sufficient time to migrate the traffic described above. All traffic must be moved by November 28, 2025. All ASRs for the Provo, UT Tandem switch must carry the project code of DELTUTXCDS0.

Please adhere to industry standards using normal procedures that pertain to updates and changes to the LERG for all NXXs subject to the retirement of the Delta, UT DMS10 HSO and its remotes.
