The Exchange Codes (NXX) in Numbering Plan Area (NPA) 361 currently residing in the Premont, TX DCO switch and associated remotes (see list in Table B below) will be moved to the PTLVTXXAPS0 PEO virtual switch (see details in Table A below).

**Description of Reasonably Foreseeable Impact of the Planned Changes:**

The native NPA NXX belonging to the Premont, TX DCO switch and associated remotes will be rehomed upon decommissioning of the switch and reflected in the Local Exchange Routing Guide (LERG) for the Port Lavaca, TX PEO switch. This will occur on or after December 18, 2026.

**Network Changes and Trunk Rearrangements:**

The Port Lavaca, TX PEO switch will be the recipient office of traffic migrated from the Premont, TX DCO switch and Associated remotes. Traffic bound for the codes listed in Table B will be delivered via the Port Lavaca, TX Tandem (PTLVTXXA02T Intra-Lata SHA/ PTLVTXXA02T Inter-Lata FG Access SHA).

After all traffic is migrated off the Premont, TX DCO switch and remotes, it will be retired and removed from the network.

**Description of Reasonably Foreseeable Impact of the Planned Changes (cont.):**

CLECs, IXCs, IECs, wireless carriers and paging carriers will need to secure new trunk groups built to the Port Lavaca, TX Tandem or have existing trunk groups to that switch augmented. Carriers that have direct end office trunks (DEOT) with access connectivity in the Premont, TX DCO switch and remotes will be required to reposition the codes to the Port Lavaca, TX Tandem switch.

All ASRs (Access Service Requests) for the Port Lavaca, TX Tandem switch must be received no later than November 20, 2026, to provide sufficient time to migrate the traffic described above. All traffic must be moved by December 4, 2026. All ASRs for the Port Lavaca, TX Tandem switch must carry the project code of PRMTTXADS0.

Please adhere to industry standards using normal procedures that pertain to updates and changes to the LERG for all NXXs subject to the retirement of the Premont, TX DCO switch and remotes.
