Copper Retirement Notification

Date of Bulletin: May 11, 2016
Notice #: CCBFTR01221
Audience: Interconnection Customers in Dallas, PA (CLLI: DLLSPAXD)
Subject: Notification of Copper Retirement Pursuant to 47 C.F.R. § 51.332
Date Effective: January 1, 2017

Network Change:
Frontier Communications announces that it is retiring a portion of its copper loops as a result of a planned roadwork project impacting its Dallas, PA Central Office (CLLI: DLLSPAXD). The copper loops will be replaced with fiber to the home and impact a portion of the Dallas Central Office serving area.

Description of Reasonably Foreseeable Impact of the Planned Changes:
After the planned roadwork project is completed there will no longer be copper loop feeder facilities providing connectivity between Frontier’s Dallas, PA Central Office and the customer premises locations listed below. Frontier is planning to replace the existing copper loops with fiber drops as part of this project.

After the planned network changes are implemented, Frontier will (1) no longer offer services over copper facilities; and (2) cease maintaining the copper facilities.

Following the transition to fiber, customers can anticipate receiving services from Frontier that are equivalent to or better than those they received over copper facilities, and at the same prices.

In accordance with FCC Rule 47 C.F.R. § 51.332(b)(2), all carriers that are currently interconnected at this Central Office location are being notified of the upgrade. In addition, all impacted retail customers will be notified in accordance with FCC Rule 47 C.F.R. § 51.332(c)(2).
