Frontier is pleased to introduce Combination Ordering (EVCI = B) for UNI and EVC Ethernet Services. The Combo ordering process will allow Frontier to assign the UNI and EVC on a single PON. Effective December 12, 2016, Frontier will implement Ethernet Combo Ordering (EVCI = B).

**Special Note for E-PATH Services:**

- Supplements on pipeline Stand Alone UNIs (originally ordered before 12/12/16) with SPEC of EPATHU and ACT of N will be permitted.
- E-PATH UNI (SPEC = EPATHU) and EVCs (EPATHE, EPATHEG, EPATHEP) will no longer be accepted on a Stand Alone order and must be ordered with EVCI = B unless ordering a second EVC to an existing EPATH UNI.
- E-PATH Orders for NNIs (SPEC = EPATHN) and Core POPs (SPEC = EPATHCP) must be ordered as Standalone NNIs.
- ASR Samples for Combo Ordering will be published at [https://wholesale.frontier.com/wholesale/access-services/asr-samples-by-product](https://wholesale.frontier.com/wholesale/access-services/asr-samples-by-product)
- The Pre-Qualification form will no longer be required for E-PATH Services.
