On February 8, 2017, Roscommon County Michigan Central Dispatch changed their 9-1-1 Service provider to Peninsula Fiber Networks [PFN]. As of August 31, 2017, Frontier Communications will be discontinuing traffic for Roscommon County Michigan for all subscribers in exchanges that currently default route to Alpena.

On August 31, 2017, Roscommon County 9-1-1 traffic currently being handled by Frontier's selective routers will be cut off and no longer be routed to PFN, nor any other 9-1-1 entity.

ILECs, CLECs, Wireless, and VoIP providers, who require 9-1-1 service for their customers in Roscommon County Michigan, must establish new 9-1-1 trunks to the PFN Selective Routers immediately to mitigate impacting 9-1-1 service for their customers.

The change impacts ILECs, CLECs, Wireless and VoIP providers connected to either of the following Frontier Selective Routers:

- Alma DMS100 Selective Router: ALMAMIXG5ED
- Roscommon/Skyline ECS1000 Router: RSCMMIXH2ED
