Carrier Customer Bulletin

SHORT TERM PUBLIC NOTICE UNDER RULE 51.333 (a)

Date of Bulletin: July 16, 2020
Notice #: CCBFTR01822
Audience: Carrier, IXC, Wireless, CLEC
Subject: Short Term Public Notice Under Rule 51.333 (a) – Gloversville, New York (CLLI: GLVVNYXA2ED)
Date Effective: 12/31/2020

Network Change:
Beginning December 3, 2020, emergency calls originating in Fulton, Montgomery & Hamilton Counties, NY will be selectively routed to the Public Safety Answering Point (PSAP) via a new selective router in Gloversville, NY (CLLI: GLVVNYXA3ED). The new selective router is SS7-capable and will provide faster call set-up times to process and complete emergency calls.

Presently, emergency call traffic in Fulton, Montgomery & Hamilton Counties, NY is selectively routed by a Comtech XSR router located at Gloversville, NY (CLLI: GLVVNYXA3ED). As of December 31, 2020, this device will no longer have manufacturer support. The replacement selective router is a Nortel DMS100 selective router located at Gloversville, NY (CLLI: GLVVNYXA3ED). This platform is fully supported by the manufacturer, Genband.

This notification directs all service providers, serving subscribers in the Counties of Fulton, Montgomery & Hamilton, State of New York, to order new SS7 Emergency Services (ES-type) message trunks to the new selective router. Migration of service provider traffic to the new selective router must occur between August 3, 2020 and December 2, 2020. It is imperative that all service providers migrate their 9-1-1 traffic to the new selective router during this time frame. Effective December 31, 2020, the existing Comtech XSR selective router serving Fulton, Montgomery & Hamilton Counties, NY will be taken out of service.

Description of Reasonably Foreseeable Impact of the Planned Changes:
9-1-1 Traffic must be migrated to the new selective router in Gloversville, NY during the August 3 to December 2, 2020 time period. All new facility orders must be placed at least 10 working days prior to placing the associated trunk orders. This will allow the effected Service Provider(s) to note the new Frontier T1 circuit ID on the new trunk order(s). Providing the associated T1 circuit ID when placing a new trunk order ensures timely order fulfillment, allowing progress to be made on the new T1 order prior to beginning the associated trunk order.

Frontier has prepared diverse facility paths to the single replacement selective router located in Gloversville, NY. These diverse paths extend toward the selective router from Frontier’s 1/0 digital access cross-connect systems (DACS) located at Gloversville, NY. Service providers that currently do not have T1 facilities to the Gloversville, NY DACS (CLLI: GLVVNYXAK02) will
need to order those T1s, prior to placing their trunk orders to the new Gloversville, NY DMS (CLLI: GLVVNYXA3ED). (Note: Either B8ZS/ESF or AMI/SF will work). Please do not overlook this important requirement.

These "streamlined" ESNs are to be used when placing trunk orders with Frontier. Use the appropriate value as the "default ESN" value on the trunk order:

- **Wireline Providers** – 100
- **Wireless Providers** – 101
- **VOIP Providers** – 102

NOTE: 1) GLVVNYXA3ED SS7 Point Code= Point Code 218.101.001
2) Gloversville 1/0 DACS: (CLLI: GLVVNYXAK02)
   415 East Andy Devine
   Gloversville, NY 86401
