<th>NOTES</th>
</tr>
</thead>
</table>
| LOOPSTA T | Loop Status             | C           | 1            | A               | A Facilities Qualified  
B Facilities Not Qualified  
F Not qualified due to length  
G Not qualified due to pair gain | Prohibited when MLT field is populated.  
A loop qualification basic should always be attempted first. Requery using a Loop Qualification Extended (TXTYP = P) when the following responses are returned:  
B = Facilities Not Qualified  
A value of "A" indicates the requested facility is qualified for 2W ISDN service  
A value of "B" indicates the requested facility is not qualified for 2W ISDN service. This will result when facilities are not available or if the loop is loaded and exceeds existing service parameters.  
A value of "F" indicates requested facility is not qualified for 2W ISDN service due to excessive loop length  
A value of "G" indicates requested facility does not support ISDN. This may result when a location is only served by Integrated pair gain or no spare facilities are available. | A value of "A" indicates the requested facility is qualified for 2W ISDN service  
A value of "B" indicates the requested facility is not qualified for 2W ISDN service. This will result when facilities are not available or if the loop is loaded and exceeds existing service parameters.  
A value of "F" indicates requested facility is not qualified for 2W ISDN service due to excessive loop length  
A value of "G" indicates requested facility does not support ISDN. This may result when a location is only served by Integrated pair gain or no spare facilities are available. |
| INTMSG   | Interim Message          | C           | 71           | AN              | The following message will be returned to indicate that the request has been sent for manual processing - Manual Processing required - response will be provided within 48 hours  
Optional when TXTYP = "P", otherwise prohibited  
Manual processing may take up to 48 hours | Identifies that the request has been sent for manual processing | | |
| PRESPC   | Provider Response Code   | C           | 14           | AN              | See Pre-Order Response Error Code Matrix for full list.  
Required if error condition exists, otherwise prohibited | Provider Response Code- Identifies a provider specific code on the response transaction that represents what occurred on the associated inquiry transaction. | | |
