</thead>
</table>
| BOX        | Box Number-Identifies the box number of the service address. | (9 alphanumeric characters) | 1. Required when ROUTE field is populated, otherwise prohibited.  
2. Prohibited if MLT field is populated.  
3. Special Characters allowed; Ampersand, Apostrophe, Asterisk, Hyphen, Number Sign, Parentheses, Space. |
| RESID      | Response Identifier-Identifies the response number assigned by the provider to relate associated transactions. | N06220011 (17 alphanumeric characters) | 1. For TXTYP=K, certain front-end applications may require a subsequent query if manual processing is required. This field if provided on the initial response indicates a subsequent query is required to retrieve loop qual data.  
2. This field if applicable will only be returned in conjunction with the INTMSG field. |
| AFT        | Address Format Type-Identifies the format of the address being supplied. | (1 alpha character) | 3. When AFT = "C" or "N", SANO field must be populated.  
4. Prohibited if MLT or INTMSG field is populated. |
| SAPR       | Identifies the prefix for the address number of the service address | (6 Alphanumeric characters) | - |
| SANO       | Service Address Number-Identifies the number of the service address. | 450 (10 alphanumeric characters) | 1. See SATH Values  
2. Required when AFT= "C" or "N".  
3. Prohibited if MLT field is populated.  
4. Special Characters allowed; Hyphen.  
5. When a Hyphen appears it must be followed by a Numeric. |
| SASF       | Service Address Number Suffix-Identifies the suffix for the address number of the service address | 1/2 (4 alphanumeric characters) | 1. Optional if SANO field is populated, otherwise prohibited.  
2. Prohibited if MLT field is populated.  
3. Special Characters allowed; Virgule.  
4. When a Virgule appears it must be preceded and followed by a Numeric. |

<th>Notes</th>
</tr>
</thead>
</table>
| **LV1**        | Location Value 1-Identifies the value associated with the first location designator of the address. | 12 (10 alphanumeric characters)                   | 1. See SATH Values  
2. Required if LD1 is populated, otherwise prohibited.  
3. Special Characters allowed; when LD1 = Bldg; Apostrophe, Hyphen, Space; when LD1 = Pier or Wing; Hyphen, Space.  
4. LV1 will be used to identify the structure value of the end user's location. |
| **PVCINDCODE** | Customer Privacy Indicators-Provides information about any customer privacy indicators in use | (50 alphanumeric characters)                      | 1. Prohibited when MLT or INTMSG field is populated.  
2. This field is only optional if query by working telephone number.                                                                                                                                  |
### x-DSL Loop Qualification (TXTYP = H,K) Pre-Order Response

<table>
<thead>
<tr>
<th>Field Name</th>
<th>Field Description</th>
<th>Field Values</th>
<th>Notes</th>
</tr>
</thead>
</table>
| RSNNOTQUAL     | xDSL Reason Not Qualified-Provides information messages regarding why an address is not qualified. | (50 alphanumeric characters) Possible Values:  
- No valid loop qual data. Request manual loop qual  
- Spectrum Management T-1  
- Spectrum Management Other  
- Work Order in Progress  
- Digital Loop Carrier  
- DLC - No Copper Available  
- DLC - LST Dependent  
- DLC - Loaded Copper  
- Load Coils  
- Digital Single Carrier  
- Loop Length Exceeds Svc Requested  
- PARTS Suspend  
- RSU  
- RSU - CSA Compliant  
- RSU - Not CSA Compliant  
- Fiber To The Premise Only | 1. When TXTYP = "H", and RSNNOTQUAL = "No valid loop qual data. Request manual loop qual" or "DLC - LST Dependent" is returned, resubmit query using TXTYP = "K" (xDSL Loop Qualification Extended).  
2. The valid entry "DLC - LST Dependent" indicates the address is served by DLC and line station transfer (LST) availability is unknown. Qualified Copper is dependent upon successful completion of an LST.  
3. The valid entry "No valid loop qual data. Request manual loop qual" is not applicable when TXTYP = "K".  
4. The valid entry "DLC - Loaded Copper" indicates the address is served by DLC and Loaded Copper is present.  
5. The valid entry "PARTS Suspend" indicates an exhaust condition has been reached in a remote terminal that has been equipped with PARTS capability.  
6. The valid entry "RSU" indicates the loop is served by a remote switch unit.  
7. The valid entry "RSU - CSA Compliant" indicates the remote switch unit meets CSA guidelines.  
8. The valid entry "RSU - Not CSA Compliant" indicates the loop is currently served by a remote switch unit and does not meet CSA standard guidelines. i.e. Loop length exceeds CSA limit or load coils are present.  
9. Fiber to the Premise Only indicates that an address is only served by Fiber to the Premise.  
10. The valid entry Fiber to the Premise Only is not applicable for TXTYPE = K, (xDSL Loop Qualification Extended).  
11. Required when LOOPSTAT = "B".  
12. Prohibited when MLT or INTMSG field is populated. |
| UPDT           | Update Date and Time-Identifies the update date and time for manually entered loop length or Reasons Not Qualified. | (20 alphanumeric characters) | 1. Prohibited when MLT or INTMSG field is populated.  
2. Special characters allowed; Colon, Comma, Hyphen, Space, Virgule.  
3. This date and time will return whenever a loop length has been manually entered or changed or when a reason not qualified has been entered or changed. |

<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>MSG</td>
<td>Informational Message-Contains supplemental message text.</td>
<td>(78 alphanumeric characters)</td>
<td>1. Prohibited when MLT or INTMSG field is populated. 2. Special Characters allowed; Ampersand, Apostrophe, Asterisk, Colon, Comma, Dollar Sign, Hyphen, Number Sign, Parentheses, Percent Sign, Period, Plus Sign, Quotation Marks, Semicolon, Space, Virgule.</td>
</tr>
<tr>
<td>FE</td>
<td>Facility Environment-Identifies the type of facility serving the end user</td>
<td>(1 alpha character)</td>
<td>1. Prohibited when MLT or INTMSG field is populated.</td>
</tr>
<tr>
<td>LST</td>
<td>Local Service Termination-Identifies the CLLI code of the end office switch from which service is being provided.</td>
<td>(8 alphanumeric characters)</td>
<td>1 Prohibited when MLT or INTMSG field are populated. 1 Special Characters allowed; Hyphen, Space.</td>
</tr>
<tr>
<td>LOOPSTAT</td>
<td>Loop Status-Identifies the status of the xDSL loop qualification.</td>
<td>(1 alpha character)</td>
<td>1 Prohibited when MLT or INTMSG field is populated.</td>
</tr>
</tbody>
</table>

Format:
1. A value of "A" indicates facilities are xDSL qualified. The length is less than or equal to 18,000 feet and no reason not qualified are present or the location is served by xDSL capable remote terminal.
2. When TXTYP = "H", a LOOPSTAT value of "B" indicates either the length is greater than 18,000 feet, reasons not qualified are present or no valid data is available.
3. When TXTYP = "K", a LOOPSTAT value of "B" indicates either the length is greater than 18,000 feet or reasons not qualified are present.
### x-DSL Loop Qualification (TXTYP = H,K) Pre-Order Response

<table>
<thead>
<tr>

<th>Field Values</th>
<th>Notes</th>
</tr>
</thead>
</table>
| **LC** | Location Code-Identifies the CLLI Code of the initiation point for the F1 segment. | MILNTN01 (11 alphanumeric characters) | 1 Prohibited when MLT or INTMSG field are populated.  
1 Special characters allowed; Hyphen, Space. |
| **LL** | Loop Length-Identifies the distance from the wire center to the end user location. | 11.5 (8 alphanumeric characters) | 1. Prohibited when MLT or INTMSG field is populated.  
2. Prohibited if RTIND = Y.  
3. Special characters allowed; Period, Space.  
4. Length may include bridged tap.  
5. Measurements will always be in kilofeet (kft). |
| **INTMSG** | Interim Message-Identifies that the request has been sent for manual processing. | (71 alphanumeric characters) | 1. Optional when TXTYP = "K", otherwise prohibited.  
2. Manual processing may take up to 48 hours. |
| **LPAC** | Loop Product Available Code-Identifies which xDSL products are available | 12345 (50 alphanumeric characters) | 1. Provided when LOOPSTAT = "A", otherwise prohibited.  
2. Prohibited when MLT or INTMSG field is populated.  
3. Special characters allowed; Comma, Hyphen, Space.  
4. It is possible to receive more than one service in a response. |

**SATELLITE**: Does not support for Broadband services

---

1. The following tariffed wholesale XDSL services are offered:  
   ADSL-R indicates a Loop which is less than 18,000 feet from the Central Office, IDSL (2 Wire Digital Very Low Band Class 1 - DSL) indicates a Loop which is less than 18,000 feet from the Central Office, ADSL-C indicates a Loop which is less than 12,000 feet from the Central Office, SDSL (2 Wire Digital Low Band Class 2 - DSL) indicates a Loop which is less than 12,000 feet from the Central Office, ADSL2+ - ADSL2+ extends the capability of basic ADSL by doubling the number of downstream bits, BONDED - ports are physically provisioned to the end user and the total bandwidth is equal to the sum of all provisioned ports, VDSL- Very-High Bit Rate Digital Subscriber Line, IPDSL- indicates Broadband provisioned over Internet Protocol (non ATM)  
   Any combination of services may be returned depending on the address in the inquiry.
